FAQ (Large Grants)

## **How do we apply for larger amounts of funding?**

The process for applications for Large Grants (£2,000 - £10,000) from the Zero Carbon Cumbria Community Climate Grants is slightly different.

There will be two rounds of funding, and the successful applicants will be chosen by the community at a special online meeting.

The first round of funding will have a total of £30,000 to distribute to groups. Potential applicants are invited to discuss their ideas with the project coordinator and are requested to fill out an application form by the **28th February 2022** and return it to [communitygrants@cafs.org.uk](mailto:communitygrants@cafs.org.uk)

Applications will then be checked by our funding steering group to make sure that they fit the eligibility criteria for the fund and are the type of project that we are looking to support. Successful first stage applicants will then be invited to provide a presentation to a special meeting where attendees will be asked to vote for the projects, they feel most deserve support from the fund (please note – you won't be able to vote for your own project!).

We are looking to hold this event in the evening of the **31st March 2022** – so please make a note to attend, even if you don't plan to put in a funding bid. We hope that there might be the chance for networking, perhaps the chance for other groups to offer support and maybe for projects to decide that they would like to work together in future.

Successful applicants will then receive a funding contract for their work, once they have confirmed details of budgets, delivery plans and monitoring plans.
